Pleasant Valley-C. Little, W. A. Fleming, Capt.

Ashley.

Pink Hill-James Ewing.

Others will be added. These gentlemen are authorized to receive and receipt for subscriptions, and any other work that may be wanted.

THE McCUSAULAND OIL WELL.

Nearly twelve months have been spent in putting down this well to a depth of 70,240 feet, and although oil in small quantity has come up with the sand pump, whenever it was drawn, yet, up to this time, it has not been obtained in paying quantities. The managers of this well have shown a great degree of will and determination in prosecuting this work for so long a time, and at such heavy cost.

The obstacles which they had to encounter were numerous and great, and were increased by ignorance and the distance from which tools and materials had to be brought. Yet, all these have been overcome, and for twelve months, night and day, the work has been going on with unabated energy.

There was a slight leak at 36,000 feet,

which required a week's stoppage.

After a week's stoppage, the leak was stopped, and the well again went down.

Then followed another week's stoppage.

After another week's stoppage, the well again went down.

Then followed another week's stoppage.

After another week's stoppage, the well again went down.
